	4 terms	£23,440	February 2025 > May 2026	i	2 terms of Extended English and Skills modules
			June 2025 > August 2026		

* UKVI IELTS alternatives: we can accept other tests as proof of English language. Learn more at: kaplanpathways.com/uk/ielts/

Academic entry requirements: for all course options above, you need to have completed high school at the required level. For requirements specific to your country, select your preferred degree and pathway course from our online Degree Finder: kaplanpathways.com/nottingham-trent/ug-degrees

Your course length: this is influenced by your English language score that you submit as part of the admissions process. Soon after your course starts, we'll check your English and academic level again to make sure you're on the most suitable study plan, with modules that best fit your skills and goals.

Common modules taken by all students:

- Accounting and Finance for Managers
- Business Development and Entrepreneurship
- Economics
- English for Academic Purposes
- Marketing in the Operational Context
- Quantitative Methods for Business

If you're on the Accounting and Finance pathway[†], you'll also study:

- Financial and Management Accounting

If you're on the Business pathway[†], you'll also study:

- Organisational Behaviour

Personal development activities: during your course, you'll also have activities to build practical, digital and employability skills.

Learn more about modules: you'll find module summaries later in this booklet.

****i** Optional integrated online internship**

For selected course options and an extra fee (maximum £1,400), you can take an internship as an additional final term while at the College in the UK. You will:

- apply and further develop your English language skills in a professional setting
 - build real-world experience related to your degree subject at university
 - gain additional career skills and experience and boost your CV before your degree
- See the undergraduate module summaries section for more details.

Extra support: for courses of over 2 terms, you will take additional modules from a selection of Enhancement and Extended English and Skills options (depending mainly on your IELTS score) before the modules to the left.

Students with at least UKVI IELTS 5.5:

you can study a 2.5 or 3-term course that typically includes Enhancement modules to maximise your university preparation:

- Critical Reading, Writing and Reasoning for Higher Education
- Independent and Collaborative Study

Plus up to 2 of these modules:

- Digital Applications
- Preparatory Mathematics
- Preparatory Statistics
- UK Society and Culture

Students with less than UKVI IELTS 5.5:

you will typically study Extended English and Skills modules to improve your English language level and academic skills.

Students with UKVI IELTS 4.5 or 5.0 will typically take:

- English for Academic Study 3
- Independent and Collaborative Study
- Reading and Writing 3
- Speaking and Listening 3

Students with UKVI IELTS 4.0 will typically take:

- English for Academic Study 2 + English for Academic Study 3
- Independent and Collaborative Study
- Reading and Writing 2 + Reading and Writing 3
- Speaking and Listening 2 + Speaking and Listening 3
- Study Skills Preparation

[†] For some degrees, the University will require you to take a particular pathway. Details are on the online Degree Finder and will be in your offer letter.

Accounting and Finance for Managers

Apply main principles and techniques for financial reporting and analysis and management accounting.

Art, Design and Media

Explore a range of materials, workshop techniques, processes and practical skills, and begin to develop your research, interpretation and critical evaluation skills.

Biology

Gain an understanding of biological systems and organisms, and learn about key laboratory processes.

Business Development and Entrepreneurship

Learn to produce and present a business plan, and apply consultancy techniques.

Chemistry

Gain an understanding of chemical reactions, fundamental particles and the periodic table.

Contemporary Global Issues

Explore the big issues facing humanity in the 21st century, and critically evaluate their causes and effects.

Creative Practice and Portfolio

Research the work of selected practitioners in your field, responding to and evaluating their work, in your own illustrative portfolio.

Critical Reading, Writing and Reasoning for Higher Education

Enhance your ability to read and understand complex ideas in English, and to compose convincing written arguments.

Digital Applications

Develop your digital skillset, helping you use digital tools to support academic study, including using and citing digital sources.

Economics

Gain an understanding of macro and micro economics, and explore current trends and issues in the field.

English for Academic Purposes

Develop your English to the level you need for university study, and to really get involved in academic discussions.

English for Academic Study 2

Improve your English grammar and vocabulary in order to communicate in an academic environment.

English for Academic Study 3

Expand your knowledge of English grammar and vocabulary to the level required for degree study.

Entrepreneurship

Familiarise yourself with varied concepts of creativity, entrepreneurship and innovation, and how to apply them in business.

Extended Project

Learn how to plan, carry out and report an extended project. You can choose a project topic that matches your degree and career goals, and personal interests.

Financial and Management Accounting

Interpret financial statements and explore the relationship between IT and the processing of financial information.

Historical Perspectives

Gain an understanding of the historical context of your chosen degree area, and skills such as researching, evaluating and interpreting sources.

Independent and Collaborative Study

Work independently and in teams on an academic task, and practise applying your subject knowledge and study skills.

Information Systems Analysis and Design

Explore conceptual data models and the use of system blueprints.

Information Technology

Discover the key concepts of computer science, including data representation and programming languages.

Intermediate Digital Applications

Develop skills in problem-solving and creative practice using a range of software packages appropriate to your field of study.

Intermediate Mathematics

Expand your knowledge of mathematical concepts including algebra, geometry, problem-solving, trigonometry and vectors.

Introduction to Information Systems Analysis

Develop an understanding of the main principles of conceptual systems modelling, and utilise traditional structured approaches to information systems analysis and design.

Logic and Critical Thinking

Explore the concepts, history and skills relating to logic and critical thinking, and how they apply in real-world contexts.

Marketing in the Operational Context

Learn about marketing as it is used within a business, and the impact of core activities on performance.

Mathematics

Develop your mathematical skill set in areas such as algebra, decision maths, probabilities and statistics.

Maths for Computing 1

Develop relevant mathematics skills to solve basic computing related problems.

Maths for Computing 2

Further develop and apply mathematical skills used to solve a range of problems in a computing context.

Networking

Gain an understanding of the key theories relating to contemporary computer networks.

Organisational Behaviour

Explore the effects of managements, human resources and organisations in a global context.

People, Culture and Society

Learn about the history, theories and issues that relate to human culture and society around the world.

Physics

Gain an understanding of areas such as astrophysics, electromagnetism, mechanics and thermodynamics.

Practical Skills for Art and Design

Develop your practical Art and Design skills through workshops and portfolio development opportunities.

Preparatory Mathematics

Develop your numeracy skills, including algebra, geometry and graphs.

Preparatory Science

Gain an introduction to core scientific knowledge, and subject-specific language required to study the sciences.

Preparatory Statistics

Build on your knowledge of using statistics, including the use of data to illustrate facts and support theories.

Python Programming and Computer Technology

Create basic programming algorithms to solve problems, and develop an awareness of how computer systems work at a fundamental level.

Quantitative Methods for Business

Learn about quantitative techniques as used in the modern business environment.

Reading and Writing 2

Develop your English reading and writing so that you can understand and articulate ideas and reasoning.

Reading and Writing 3

Develop your English reading and writing skills to a sufficient level to communicate complex ideas.

Software Design and Implementation

Discover the structure of procedural code and object-orientated programme design.

Speaking and Listening 2

Practise listening and speaking so that you are better prepared for academic debate and discussion.
